

Overview of Research Security

Dr. Rebecca Keiser, Chief of Research Security, Strategy and Policy (CRSSP)

University of South Alabama

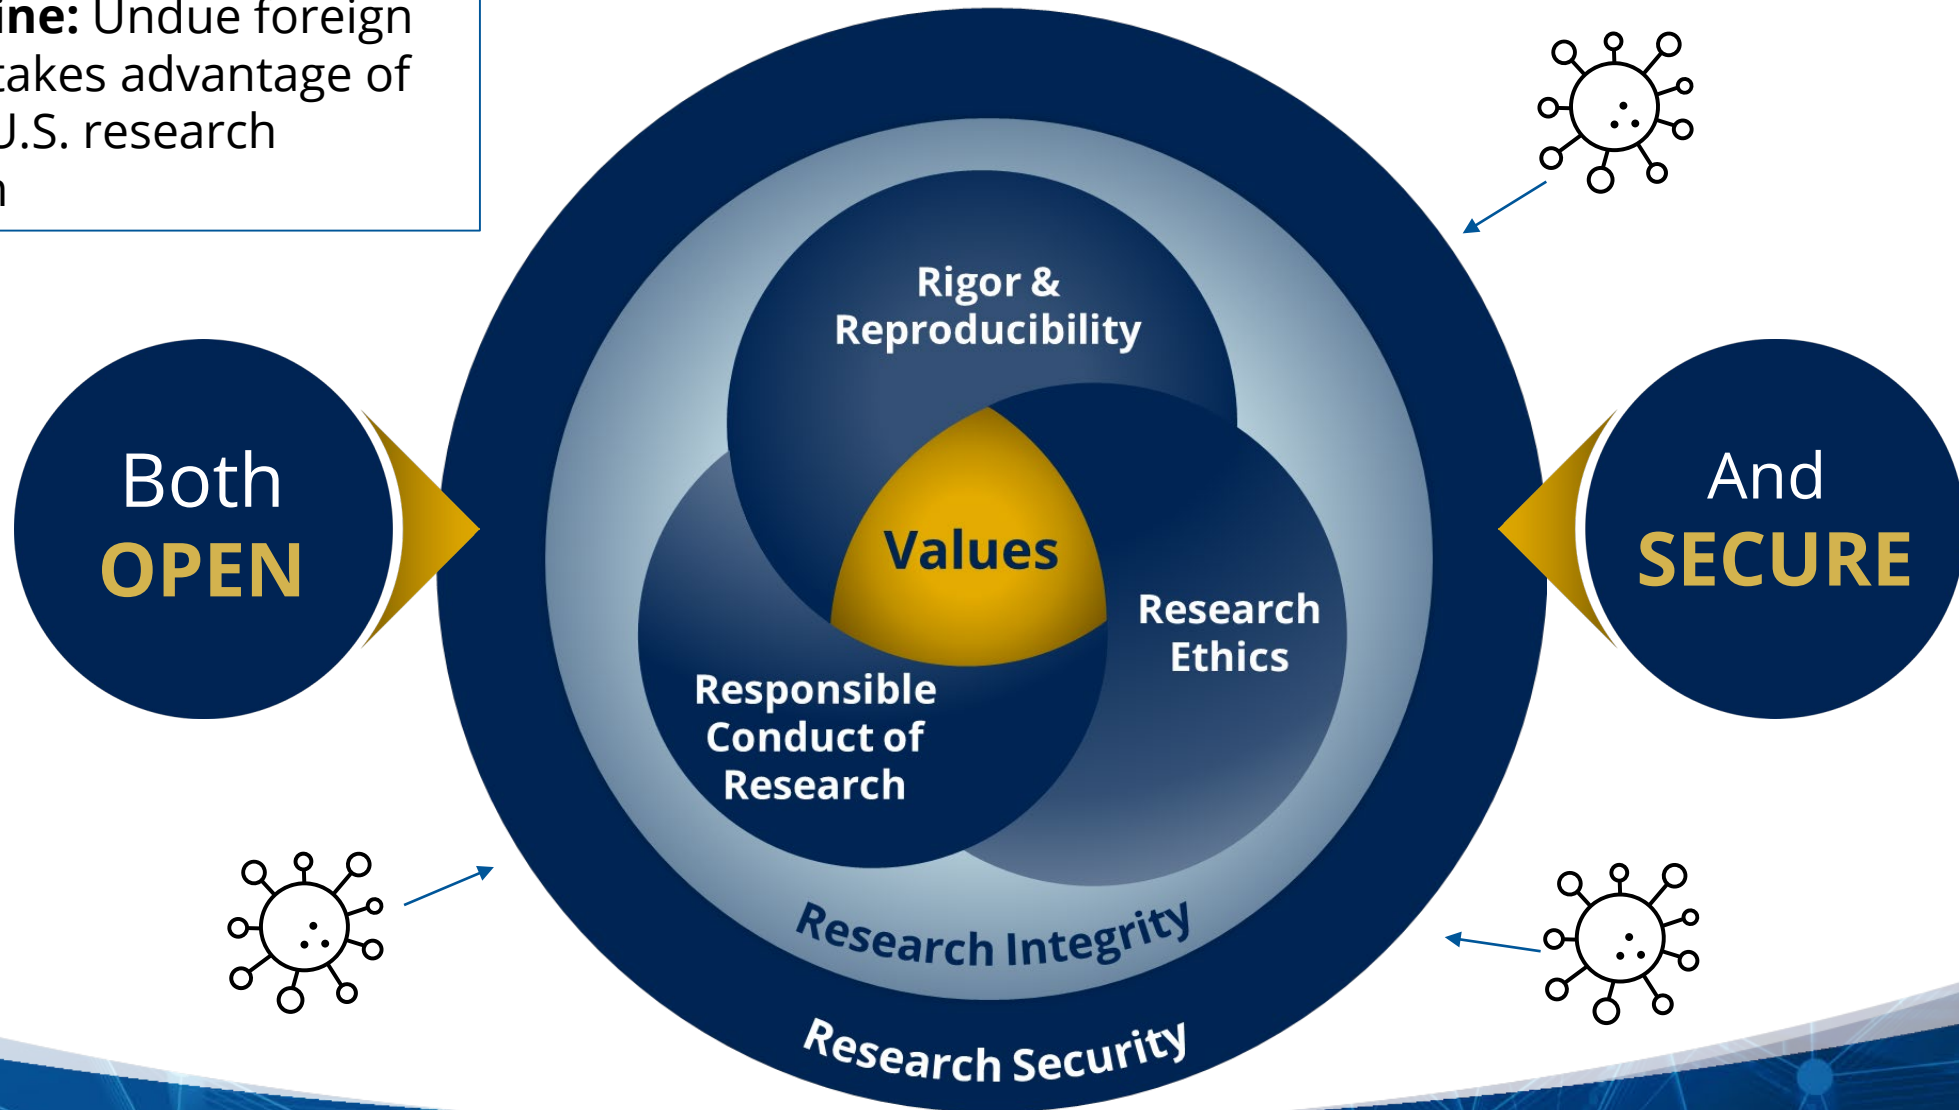

May 20, 2024

Research Security Timeline

Cell Diagram of Research Security

Bottom Line: Undue foreign influence takes advantage of the open U.S. research ecosystem

Research Security by All Actors

Funders

- Collecting appropriate disclosures
- Assessing research proposals for risk
- Working to mitigate risk to “get to yes”

Research Institutions

- Ensuring disclosures are complete
- Overseeing use of research funding
- Reviewing potential international interactions
- Creating a “research security safety culture”

Researchers

- Understanding terms of any proposed affiliation or funding source
- Communicating with home institution and funding agency
- Promoting a “research security safety culture” in the lab

SECURE

Safeguarding the Entire Community in
the U.S. Research Ecosystem

Mission:

Empower the research community to make security-informed decisions about research security concerns

Approach:

Providing information, developing tools, and providing services

Audience:

Universities, non-profit research institutions, and small and medium-sized businesses

Research On Research Security program (RORS)

Research on Research Security Program (RORS)

NSF seeks to fund research that will...

Identify and characterize attributes that distinguish research security from research integrity

Improve understanding of the nature, scale, and scope of research security risks

Provide insight into methods for identifying, mitigating, and preventing research security violations

Develop methodologies to assess the potential impact of research security threats on the U.S. economy, national security, and research enterprise

Research Security Training Modules

Research Security Training for the U.S. Research Community

- Four teams developed research security training frameworks and training modules
- Co-funded with National Institutes of Health, Department of Energy, and Department of Defense
- Available for all appropriate researchers, stakeholders, students, academics, research security experts and leaders, government agencies and national laboratories

Module Topics

1

What is
Research
Security

2

Disclosure

3

Manage and
Mitigate Risk

4

International
Collaboration
